Main Procedure file
Multiple detector display mode, Re-scale y-axis, y-axis minimum, y-axis maximum
Unipolar / Bipolar, No of detectors

(For each detector)

Minimum integration limit, Maximum integration limit, Peak height at which width is determined, Time at which peak height is measured, Time at which autozero is measured, Autozero mode, Autozero offset, Signal transformation function, Analog input channel

Startup digital output channel 1, Startup digital output channel 2
Function key values
Function key type (serial or digital)
Limit for warnings
Limit for alarms
Limit for check standard
Limit for noise check
Set point
Re-calibration procedure
Serial port
Serial port configuration
